

GeniusConnect

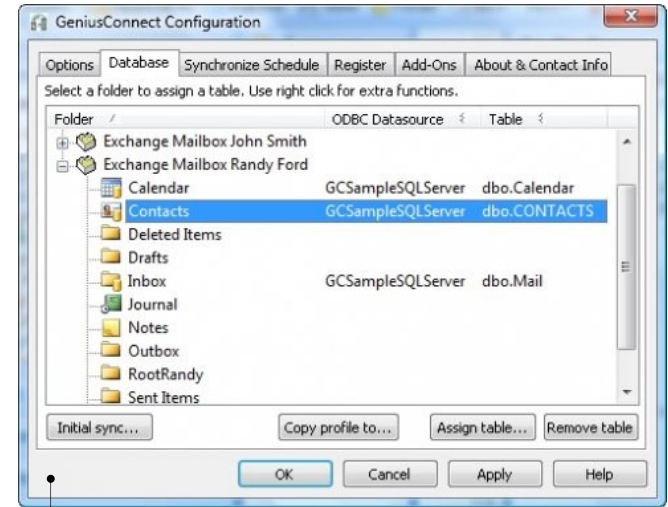

Bridge between your database and Microsoft® Outlook®

GeniusConnect enables synchronization between Outlook folders and any SQL database with ODBC support.

A folder can be linked to a database table or view. You can use your own table structure and define conversions for columns with data type's that are not compatible with Outlook fields. It is possible to synchronize multiple Outlook or Exchange folders and multiple databases.

Supported synchronization directions

- 1 way: Outlook -> SQL database
- 1 way: SQL Database -> Outlook
- 2 way: Outlook <-> SQL database.
- 2 way: with conflict resolution support

GeniusConnect
